Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

Applicant's election of Group I in Paper No. 7 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 3, 4, 13, 15, 16, and 20 rejected under 35 U.S.C. 102(b) as being anticipated by Huffmaster (US 5,437,253)*.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 2, 5, 6, 7, 14, 17, 18 and 19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Huffmaster (US 5,437,253) in view of Murakami (US 5,337,720). Huffmaster

Art Unit: 3747

discloses a system for contrlling the transient torque output od ta multicylinder with a means for deactivating the cylinders and a means for controlling at least one actuator to reduce the torque excusion (See Abstract, Col. 2. lines 1-20). However, Huffmaster does not show the use of a variable cam timing device to reduce the torque excursion. Murakami shows that the provision of a cam timing device for reducing the torque excursion is old and well known in the art. Since the prior art references art from the same field of endeavor, the purpose disclosed by Murakami would have been recognized in the pertinent art of Huffmaster. Therefore, it would have been obvious at the time the invention was made to a person having ordinary skill in the art to provide the device of Huffmaster with the cam device as taught by Murakami.
